

Freedom holds storage answer

Whether you need tanks to transport thousands of litres of water by road, or just a new chemical tank for your boom spray, Freedom Tanks has the answer.

Freedom Tanks is a market leader in designing and manufacturing high quality and reliable tanks for a wide range of uses.

Freedom's comprehensive product range includes cartage tanks, storage tanks, cattle and sheep watering troughs and tanks for liquid fertiliser.

Founded in WA, Freedom's tanks are now used throughout all of Australia.

Their quality and value for money tanks are widely used by farmers, local and State Government agencies, truckers, water contractors ... the list goes on.

Tim and Maggie Murray, of Murray Haulage, had tried plenty of tanks over the years.

But after looking for suitable tanks to transport 48,000 litres of water for their latest contract, they settled on Freedom to deliver the best product to suit their needs.

"After trying various other tanks, we settled on four of Freedom's

12,000-litre heavy duty cartage tanks," Mr Murray said.

"I liked the ease of lifting the deck-mounted tanks to our road train and their low profile.

"Freedom's baffle system is great, and there is virtually no noticeable surge."

Dean Horner, of Freedom Tanks, said that the cartage tanks were baffled to control surge and sway, with sectional drains through all compartments for automatic self-draining.

"Baffling of the tanks is an important safety feature due to the reduced surge of liquids during transport," he said.

As well as being fully baffled, Freedom's precision moulded high grade fibreglass cartage tanks, ranging in size from 200 litres to 15,500 litres, are designed to withstand the rigorous forces generated by water in motion — day after day, year after year.

The larger 15,500-litre tanks designed by Freedom have provided a solution for farmers who require a large portable source of water to keep up with the increased need driven by thirsty animals, sapling plantations and sprayers.

Freedom has also designed a one-

piece seamless fibreglass storage tank ranging from 4500 litres to 45,000 litres.

Its gel coat finish helps to keep water cooler, while its thick black internal coating blocks light, preventing the growth of biological contaminants such as algae.

Mr Horner said Freedom could offer customers a range of tanks to suit a variety of uses.

"At Freedom Tanks we offer our customers a quality product that lasts the test of time," he said.

"Whatever the industry, and whatever the task at hand, we have the tank for you."

Freedom Tanks is a fully WA family-owned company with almost 40 years' experience in the business. With offices in Perth and Brisbane, along with agents in New South Wales, Victoria and South Australia, Freedom is now servicing more people than ever.
